Yurii Zaika

Lead Software Engineer · .NET & Delphi

Ten years inside the core systems of one retail network: a Delphi trading platform that stores run on daily, and ASP.NET Core services that keep taking over its functions. Access control for 2,000+ users, fiscal and EDI integrations, and an ongoing Delphi 6 to Delphi 12 client migration.

10 years — in production retail systems, 2016 to now
2 000+ — users on the access system I built
33 — internal systems of the network carry my code
15 500 lines — of Python in the speech pipeline: 55 modules, STT and diarization
