

Yurii Zaika

Lead Software Engineer · .NET & Delphi

xetr11@gmail.com · t.me/xetr_11 · github.com/qwert11 · Dnipro, Ukraine · remote or hybrid

Ten years inside the core systems of one retail network: a Delphi trading platform that stores run on daily, and ASP.NET Core services that keep taking over its functions. Access control for 2,000+ users, fiscal and EDI integrations, and an ongoing Delphi 6 to Delphi 12 client migration.

10 years — in production retail systems, 2016 to now · 2 000+ — users on the access system I built · 33 — internal systems of the network carry my code · 15 500 lines — of Python in the speech pipeline: 55 modules, STT and diarization

STACK

Backend: C#, .NET 7 / 6 / 5, .NET Core 3.1, ASP.NET Core, ASP.NET MVC, Web API / REST, SignalR

Data: MS SQL Server, T-SQL, EF Core 7, ADO.NET, Oracle, PostgreSQL, Firebird

Python: Python 3.11, FastAPI, SQLAlchemy 2, Alembic, Pydantic, Typer CLI, Playwright

Speech and ML: faster-whisper (CUDA), pyannote.audio, VAD, Speaker diarization, Quality evaluation: RTF, latency, Streaming audio pipelines, WASAPI / sounddevice

Front end: Angular 13, TypeScript, Kendo UI for Angular, Telerik UI for ASP.NET Core, Razor / MVC views, JavaScript, HTML / CSS

EXPERIENCE

AI / Python and Full Stack Developer — Freelance and personal projects

2026-03 — present · Dnipro · remote

- A real-time speech pipeline: faster-whisper on CUDA, pyannote diarization, VAD, WASAPI capture — 55 modules, 15,500 lines of Python.
- And a regression suite for it: RTF, latency under load, noise robustness, quality ceilings — decisions come from measurements, not impressions.
- A real-estate parser in Python: SQLAlchemy 2 and Alembic over PostgreSQL, Playwright and selectolax, a Typer CLI, pytest and ruff.

Lead Application Programmer — ATB-Market

2016-06 — present · Dnipro

- Own the client side of the network's trading system: 955 units, 828 forms, MS SQL, covering supply documents, pricing and fiscal invoices.
- Since 2018 also build internal services on ASP.NET Core and Angular: access, audit, reporting, integrations — 33 of the network's systems carry my code.
- UAM: access management for 2,000+ users on OpenID Connect, ADFS and Kerberos.

Engineer Programmer — Kryvyi Rih Iron Ore Combine

2013-06 — 2016-06 · Kryvyi Rih

- A system for ore extraction and shipment accounting, developed and maintained in production.
- Automated per-shift distribution of consumables and hazard-pay meals.
- Maintained production-preparation and budgeting systems; implemented Firebird table synchronization.

Freelance and private practice (2015–2016) · Modern Professions Courses (2015–2016) · OSSystem (2012–2013)

KEY PROJECTS

Real-time speech pipeline (ORK) (2026). Real-time speech recognition from calls: parallel microphone and system-audio capture, VAD-based segmentation, faster-whisper on GPU, pyannote diarization with incremental clustering, translation.

Python 3.11, faster-whisper, pyannote.audio, CUDA, FastAPI, NumPy, WASAPI

Trading client migration: Delphi 6 to Delphi 12 (2024 — 2026). Moving the trading system client (955 units, 828 forms) to a modern compiler with a core redesign.

Delphi 12/13, Object Pascal, VCL, MS SQL, DevExpress, FastReport

UAM — access management (2020 — 2022). Centralized permissions and authentication for 2,000+ people in the network: roles and access requests, Active Directory integration, sign-in through OpenID Connect, ADFS and Kerberos.

ASP.NET Core, C#, EF Core, MS SQL, OIDC, ADFS, Angular

EDUCATION AND CERTIFICATES

- Computer Engineering · computer systems and networks — Zaporizhzhia Institute of Economics and Information Technologies (2008 — 2011)
- Mining Engineer, underground development — Kryvyi Rih Technical University (1998 — 2003)
- Angular 9 — Luxoft (2021)
- Programming in Delphi — Institute of Modern Professions (2006)

LANGUAGES

- Ukrainian — native
- English — technical documentation and written communication; spoken at basic level
